

Bureau of Land Management, Interior

§ 2440.1

§ 2430.5 Additional criteria for classification of lands valuable for residential, commercial, agricultural, or industrial purposes.

(a) Lands which have value for residential, commercial, agricultural, or industrial purposes, or for more than one of such purposes, will be considered chiefly valuable for that purpose which represents the *highest and best use* of the lands, i.e., their most profitable legal use in private ownership.

(b) Lands may be classified for sale pursuant to the Public Land Sale Act as being chiefly valuable for residential, commercial, agricultural, or industrial uses or development (other than grazing use or use for raising native forage crops), if (1) adequate zoning regulations are in effect, and, where the lands also are needed for urban or suburban development, (2) adequate local governmental comprehensive plans have been adopted.

(c) Lands determined to be valuable for residential, commercial, agricultural, or industrial purposes may be classified for disposal under any appropriate authority other than the Public Land Sale Act if (1) disposal under such other authority would be consistent with local governmental comprehensive plans, or (2) in the absence of such plans, with the views of local governmental authorities.

(d) Lands outside of Alaska may be classified as suitable for homestead entry under part 2510 of this chapter if they are (1) chiefly valuable for agricultural purposes, and (2) suitable for development as a home and farm for a man and his family, and (3) the anticipated return from agricultural use of the land would support the residents. If it is determined that the irrigation of land otherwise suitable for homestead entry would endanger the supply of adequate water for existing users or cause the dissipation of water reserves, such land will not be classified for entry. Land may be classified for homestead entry only if rainfall is adequate, or if under State law, there is available to the land sufficient irrigation water, to permit agricultural development of its cultivable portions.

(e) Lands may be classified as suitable for desert land entry under part 2520 of this chapter if (1) the lands are

chiefly valuable for agricultural purposes, and (2) all provisions concerning irrigation water set forth in § 2430.5(d) are met.

(f) Lands outside of Alaska may be classified as suitable for Indian allotment under part 2530 of this chapter if (1) the lands are valuable for agricultural purposes, and (2) the lands are on the whole suitable for a home for an Indian and his family, and (3) the anticipated return from agricultural use of the land would support the residents, and (4) the requirements for water supplies set forth in § 2430.5(d) are met.

(g) Lands determined to be valuable for purposes other than public purposes may be determined to be suitable for exchange if the acquisition of the offered lands, the disposition of the public lands, and the anticipated costs of consummating the exchange will not disrupt governmental operations.

§ 2430.6 Additional criteria for lands valuable for other purposes.

Lands may be classified for disposal under any applicable authority where they are found to be chiefly valuable for purposes other than those described in §§ 2430.2–2430.5 of this section and to be not suitable for retention for multiple use management.

PART 2440—SEGREGATION BY CLASSIFICATION

Subpart 2440—Criteria for Segregation

Sec.

2440.1 Use of criteria.

2440.2 General criterion.

2440.3 Specific criteria for segregative effect of classification for retention.

2440.4 Specific criteria for segregative effect of classification for disposal.

SOURCE: 35 FR 9562, June 13, 1970, unless otherwise noted.

Subpart 2440—Criteria for Segregation

§ 2440.1 Use of criteria.

The following criteria will govern the determination of the extent to which classifications and proposed classifications will segregate the affected lands

§ 2440.2

from settlement, location, sale, selection, entry, lease, or other forms of disposal under the public land laws, including the mining and mineral leasing laws. The segregative effect of each classification or proposed classification will be governed by applicable laws and regulations, and will be stated in the classification notice or decision.

§ 2440.2 General criterion.

The public lands classified or proposed to be classified under the regulations of this part will be kept open to (i.e., not segregated from) as many forms of disposal as possible consistent with the purposes of the classification and the resource values of the lands.

§ 2440.3 Specific criteria for segregative effect of classification for retention.

(a) Public lands classified or proposed to be classified for retention for multiple-use management will be segregated from those forms of disposal which, if the lands remain open thereto, could:

(1) Interfere significantly with the management of the lands under principles of multiple use and sustained yield, or

(2) Impair or prevent, to an appreciable extent, realization of public values in the lands, or

(3) Impair or prevent, to an appreciable extent, realization of the objectives of retention and management set forth in part 2420, or

(4) Lead to unnecessary expenditures of public or private funds arising out of individual efforts to acquire public lands under laws, which are in fact not applicable, because of the nature of the resources of the lands.

(b) In applying the criteria in paragraph (b)(1) of this section, land shall not be closed to mining location unless the nonmineral uses would be inconsistent with and of greater importance to the public interest than the continued search for a deposit of valuable minerals.

§ 2440.4 Specific criteria for segregative effect of classification for disposal.

Public lands classified or proposed to be classified for disposal will be seg-

43 CFR Ch. II (10–1–03 Edition)

regated from those forms of disposal which, if the lands remained open thereto, could interfere with the orderly disposal of the lands pursuant to appropriate law. Public lands classified or proposed to be classified for sale under the Public Land Sale Act (78 Stat. 988, 43 U.S.C. 1411–18) will be segregated from all forms of disposal under the mining and mineral leasing laws.

PART 2450—PETITION-APPLICATION CLASSIFICATION SYSTEM

Subpart 2450—Petition-Application Procedures

Sec.

2450.1 Filing of petition.

2450.2 Preliminary determination.

2450.3 Proposed classification decision.

2450.4 Protests: Initial classification decision.

2450.5 Administrative review.

2450.6 Effect of final order.

2450.7 Right to occupy or settle.

2450.8 Preference right of petitioner-applicant.

SOURCE: 35 FR 9563, June 13, 1970, unless otherwise noted.

Subpart 2450—Petition-Application Procedures

§ 2450.1 Filing of petition.

(a) When (1) land must be classified or designated pursuant to the authorities cited in § 2400.0–3 before an application may be approved and (2) the filing of applications is permitted prior to classification, the application together with a petition for classification on a form approved by the Director (hereinafter referred to collectively as a *petition-application*) must be filed in accordance with the provisions of § 1821.2 of this chapter. Lists indicating the proper office for filing of applications may be obtained from the Director or any other officer of the Bureau of Land Management. Copies of the petition for classification form and the application forms may be obtained from the proper offices or from the Bureau of Land Management, Washington, DC 20240.

§ 2450.2 Preliminary determination.

Upon the filing of a petition-application, the authorized officer shall make
